Get yourself some webfonts!

1

→ **Pick the fonts** of your desire from our website *www.typejockeys.com*

→ **Select the pageview range** of your website.

→ **Purchase and download** a webfont package.

Protect your purchase from hackers!

2

→ **Open the file** *htaccess* with a text editor. **Replace** *yourdomain* with your domain and edit the country code.

→ **Make a webfonts folder** in the root folder of your website. Put the file called *htaccess* into that folder.

→ **Rename it** to *.htaccess*. (Now it's invisible)

Embed the webfonts in your website!

3

→ **Upload the font files** to the webfonts folder.

→ **Open** *stylesheet.css* and paste the code into your CSS file. (Remember to adapt all paths to your needs.)

→ **Access the fonts** with the font-family attribute.

Enjoy great typography on your website!
